KASV

KASV 1 KP ROP KASV BIS 1 **Lilileian**

The very unified group with same head expressions with especially nice junior. Obvious similarity among them. Some front actions are not ideal, and in few muzzle is elongated due to prominent undershot bite, but the elegance of side movement is just amazing.

KASV 2 KP **Shibazhan**

All group members have shown high quality for themselves, but as a group they are not unified in their fronts and head expressions. They all move very fluently, but differs a bit in size and ratio.
